

# Bacoban<sup>WB</sup>

Water-based  
Ready-to-use

STOP  
For up to 10  
Days

Bacteria  
Fungi  
Certain Viruses

*“Advance NanoTech  
Formulation for General  
Surface Disinfection,  
Hygiene, Sanitation &  
Infection Control”*

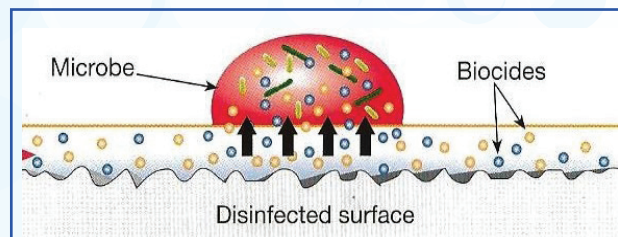

*Conventional disinfectants are alcohol based and effective for only a short period. Once dry, it loses its ability to prevent re-contamination. Until the next treatment or application, a hygiene gap occurs hence re-infestation of micro-organisms inducing risks of contamination and infection in no time at all.*

Water-based disinfection with long-term effect against viruses, bacteria & fungi

## Bacoban NanoTech Advantage

*Thanks to NanoTechnology, Bacoban leaves a sponge-like gel lining on the treated surface. Biocides are embedded in the porous structure which remain active and kills harmful micro-organism on contact. This allows long lasting protection capability unique to Bacoban Water-based Nanotech disinfectant.*

Now Available!

**Disinfectant  
WIPES**

*“Bridges the gap in between applications”*

### Aviation Approvals :

AMS1451B–Disinfectant for Aircraft Cargo Compartments

AMS1452B–General Disinfectant for Aircraft

Boeing D6-7127 – Cleaning Interiors of commercial transport aircraft

Boeing D6-17487 – Exterior & General Cleaners, Liquid waxes, polishing compounds

ASTM Std E-2180

Dubai Municipality Approval: RG/DD/11/07/00006

Eurocat Cert. DIN EN ISO 13485 - 2010
